

Bona Mix&Fill Plus

The waterborne filler with
outstanding capacity

Bona Mix&Fill Plus

Bona Mix&Fill Plus is a waterborne gap filler with a filling capacity equal to solvent-based alternatives. Its high filling capacity, short drying time and good abrasion properties make it an exceptionally reliable product. Under normal conditions you only need to apply it once, which means that you save both time, money and effort. Bona Mix&Fill Plus also offers the benefit of a very nice and natural colouration both with oil and finish. Moreover, add to this the fact that you can work without unpleasant smells and hazardous fumes.

Key Benefits

- High filling capability
- Good environmental profile
- Non-offensive smell
- Quick drying
- Good sanding ability
- Anti-corrosive
- For gaps up to 3 mm wide

Technical Data

Binding agent:	Acrylate
Solids content:	~38%
VOC:	Max 15 g/lit
Mixing ratio:	10-15% wood dust to 85-90% binder
Drying time:	- until subsequent application 15-30 minutes* - until sanding 30-60 minutes* - until finish or oil treatment 1-2 hours*
Application tools:	Stainless steel trowel
Application rate:	~8-12m ² /litre depending on size and quantity of gaps.
Safety:	Unclassified
Storage/transport:	The temperature must not fall below +5°C or exceed +25°C during storage/transport. Reseal the container directly after use.
Shelf life:	1 year from the date of production, in an opened original container.
Pack size:	3x5 litres (44 boxes per pallet)

*Assumes normal, minor gap formation on newly installed floors at 20°C/60% RH room climate. The wider and deeper the gap, the longer the drying time. Gaps wider than 2 mm need drying over night.
