

# Bona Prime Deep

# Bona Prime Deep

Bona Prime Deep is an oil based primer giving the same colour and depth to the wood as old, traditional solventbased finishes, but without containing lots of dangerous components. With a long open time the application is done without stress, giving even results time after time. The product is designed to be used with Bona's waterborne finish system.

## Key Benefits

- Problem-solver on many timbers sensitive to water-borne coatings such as smoked oak, steamed beech, donau oak, timbers with high tannin content, cherry etc.
- Easy to apply, long open time without risk of overlapping marks
- Excellent coverage rate
- Low solvent content

## Technical Data

Solids content:	Approx. 90 %
VOC:	Max. 100 gram/litre
Drying time:	Minimum 12 and max 72 hours at 20°C/60% RH
Application tools:	Buffing machine or stainless steel trowel
Application rate:	Ca. 30–40 m <sup>2</sup> /litre depending on application
Cleaning of tools:	Tools should be cleaned with white spirit immediately after application. Use acetone for dried product
Safety:	Unclassified
Fire risk:	Yes (see the Safety Data Sheet)
Flash point:	78°C
Shelf life:	2 years from date of production in unopened original container
Storage/transport:	The temperature must not fall below +5°C or exceed +25°C during storage and transport
Pack size:	6 x 1 litre (80 boxes per pallet)
